## PaveCoat

Available Sizes:  
10 & 20 Litres

**PaveCoat** is a solvent based acrylic penetrating sealer, suitable for a wide variety of concrete applications. **PaveCoat** seals, colours and protects concrete to provide a durable surface ideal for pedestrian and light vehicle traffic. It comes in Gloss as standard, but is also available in Matt and High Gloss finishes. Available in Clear and the full range of NuTech standard colours. \*

## PaveCoat Petrol Resistant

Available Sizes:  
20 Litres

**PaveCoat** Petrol Resistant provides excellent chemical resistance to petroleum fuels and oils. **PaveCoat** Petrol Resistant is recommended for vehicle workshops, fuel service stations and factory floors exposed to most petrochemicals. **PaveCoat** Petrol Resistant seals, colours and protects concrete to provide a durable surface ideal for these applications. It comes in Gloss as standard and is available in Clear and 3 standard colours, Black, Light Grey and Earl Grey. \*

## Agreseal Concrete Sealer

Available Sizes:  
20 Litres

A penetrating, non-yellowing, semi-gloss clear sealer that creates an attractive "wet look" for exposed aggregate and concrete surfaces.

Suitable for pedestrian and vehicle traffic.

## PaveCoat H<sub>2</sub>O

Available Sizes:  
15 Litres

A water based, environmentally friendly addition to the **PaveCoat** range. Provides an even, satin finish and is just as durable as the original **PaveCoat** formula. Suitable for pedestrian and vehicle traffic. Available in clear and the full range of NuTech standard colours. \*

(Colours sold as base & tint kits).

## PaveCoat Spray On Sealer

Available Sizes:  
20 Litres

A non-yellowing, semi-gloss sealer that can be applied with a sprayer. Improves the colour and durability of concrete surfaces, and is suitable for pedestrian and light vehicle traffic.

Ideal for patterned and stenciled decorative concrete surfaces.

## PaveCoat Same Day Sealer

Available Sizes:  
20 Litres

Designed to assist curing and seal new, green concrete on the day of pouring. Provides excellent protection from dirt penetration and ensures a good bond with **PaveCoat** Clear or Coloured sealers.

Suitable for pedestrian and vehicle traffic.

\*Custom colours and colour matching available upon request.

# PaveCoat

Australia's  
#1  
Concrete Sealer

## Aqua Epoxy

Available Sizes:  
4 & 20 Litre Kits

A low-odour, high-gloss, water based 2 pack epoxy coating available in clear and a small range of colours.

Suitable for interior warehouse and factory floors and food preparation areas. The cured coating is impervious to moisture and has excellent durability and chemical resistance. Suitable for pedestrian, forklift and vehicle traffic.

For internal use only.

## AquaFloor

Available Sizes:  
4 & 20 Litre Kits

Low odour and high-gloss 2 pack coating available in clear and a small range of colours.

**AquaFloor** is a water based polyurethane used for commercial, retail show rooms and industrial floors.

Suitable for pedestrian and light vehicle traffic.

For internal use only.

## EPiC Epoxy 500

Available Sizes:  
4 & 20 Litre Kits

A 2 pack solvent-based epoxy that provides a high-gloss finish for interior warehouses, factory floors and food preparation areas. Durable, chemical resistant, and available in the full AS2700 colour range.

Suitable for pedestrian, forklift and vehicle traffic.

For internal use only.

## EPiC Polycryl

Available Sizes:  
4 & 20 Litre Kits

**Polycryl** is a high-gloss 2 pack coating that provides excellent durability and chemical resistance for both interior and exterior use. Suitable for concrete and metal surfaces (after priming). Suitable for pedestrian, forklift and vehicle traffic.

## EPiC Epoxy 100

Available Sizes:  
4 & 20 Litre Kits

A solvent-less 2 pack clear epoxy, providing a high-gloss, self-levelling, high build finish.

Provides a non-slip covering when used with silica sand.

Highly durable and chemical resistant. Suitable for pedestrian, forklift and vehicle traffic.

For internal use only.

## EPiC Industrial Enamel

Available Sizes:  
4 & 20 Litres

High-gloss coating suitable for interior concrete and metal surfaces. Has excellent durability when applied over correctly prepared surfaces. Suitable for pedestrian traffic only.

## Additional Concrete Coating & Preparation Products:

### EcoSafe Concrete Etch

Water-based etching compound specifically designed to provide a surface profile on bare concrete.

### EcoSafe Degreaser

Industrial strength degreaser and heavy duty cleaner that is biodegradable, user friendly and environmentally safe.

### Anti-Slip Additives for all Sealers

Substantially improves the safety of sealed surfaces in wet and dry conditions.

### NuSlate Sealer

Clear, non-yellowing sealer designed for natural slate flooring.

### Silicon Sealer

Impregnating sealer suitable for a wide range of porous substrates with damp proof courses to prevent rising damp.

### Aqua Stop

Water based silicon emulsion that is VOC compliant, deep penetrating, and water repellent.

### EcoSafe Strip

Water Based paint and sealer stripper designed to be environmentally friendly and safe for users.

### Seal Repair Solution

Solution used to rectify old or new sealer adhesion problems.

### Reactivating Solvent

Used to redissolve old PavCoat sealers before resealing with new sealer.

### Chlorinated Rubber

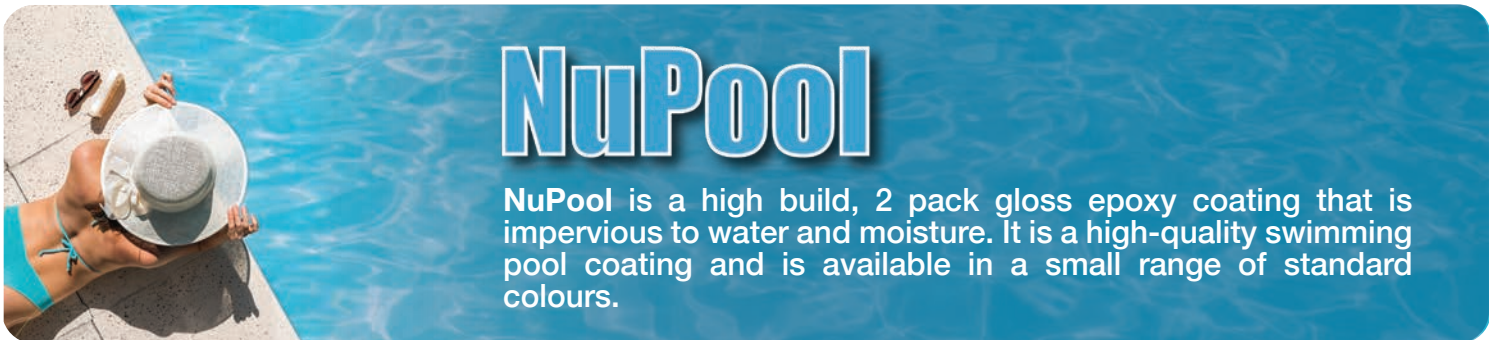

Semi-Gloss exterior coating for concrete flooring, walls and masonry surfaces.

### Line Marking Paint

Water based and solvent based. Available in white, safety yellow, signal red, blue and black.

### Solvents

PavCoat Thinners, PR Solvent (X5), EPiC Epoxy 500 Thinners and Polycryl Thinners (X5), all available in a range of sizes.

### NuCourt

Sports surface coating for asphalt and concrete surfaces.

Available Size: 15 Litres

**NuCourt** hard court sports surface coating range has been specifically designed to create a solution to give a responsive, hard wearing durable surface to sporting surfaces with the additional features of:

- Exceptional durability with a Non Slip coating.
- UV stable and nonfading.
- Specially designed for an active sports surface.
- Can be line marked with nonslip acrylic lines.
- Performs exceptionally well under hot and cold weather conditions, provided correct surface preparation has been ensured.
- Excellent protection against Bacteria and Mould.
- Special Primers and Fillers have been designed for these surfaces.
- High build coating provides a smooth surface to asphalt when used with **NuCourt** filler.
