UES seating

UES SEATING prides itself on creating and supplying the most unique and diverse transportation seating range in the world. UES seating products are devised and crafted by our in house design and production team to focus on the following of essential parameters of transportation seat engineering. Manufactured in Australia and USA.

Alex Zanda

Alex Zanda is the amalgamation of UES SEATING's design, engineering and manufacturing resources with the guidance and collaboration of medical practitioner's scientific research to create leading commercial and healthcare chairs that feel as good as they look.

UES USA Inc Panther Engineering UES seating

UES (USA) INC. houses the UES Seating USA production facility and Panther Engineering, AS9100C Certified company providing precision CNC Machining for aerospace and defense prime contractors. UES (USA) INC also supplies a range of UES International hardware to the North American market.

GOLIATH

The Tradesman's Choice

A leading manufacturer and distributor of a range of high quality gate hinges, fencing products and related hardware.

UES Jennings

UES Jennings have serviced the South Coast of NSW since 1956 with a complete range of Industrial, Agricultural and Automotive Hoses and Fittings, Vee Belts, Work Clothing, Footwear, Safety Equipment, Sheet Rubber and Foam Products, through to Chemicals, Cleaning and Paper Products.

UES Fitch

UES Fitch has been a family run business for over 70 years. South Australia's Rubber Specialists with over 200 years of combined technical experience behind the counter. Whether you're after a simple rubber grommet or complex neoprene flange gaskets, we are your one stop shop for all your rubber needs.

ABOUT US

UES International has been providing specialised industrial hardware, rubber & seating solutions since 1904. An Australian family business in operation for over 100 years, UES has designed & developed a comprehensive portfolio of solutions servicing 15 industries, from the truck, bus & marine industries to defence, aerospace, HVAC, & recreational vehicle markets.

Supported by over 100 years of experience, UES provides service, expertise & an unmatched product range backed by long standing relationships with leading local and international partners. UES strives to ensure that the solutions you need are in stock, supplied on time and supported by a strong sales team spanning 16 locations around the globe.

As the fourth generation owner and Managing Director since 1997, Alex Morcos has passionately pursued excellence through all UES' divisions and industries, striving to bring to market the best solutions while always engaging with customers and their specific requirements.

UES has strategically acquired businesses that complement its existing product range and enhances its offering to industry. UES consistently invests in state of the art machinery and production systems, supported by the UES design and engineering team. Supported by ISO 9001 and CAGE Code certified manufacturing facilities, UES ensures that quality control systems are consistently audited and satisfy all requirements at the highest levels.

UES Seating, a division of UES, supplies a collection of premium maritime furniture, servicing projects from cruise ferries, commuter and Ro-Ro vessels to military and offshore support vessels. Designed in Sydney and manufactured by UES owned production facilities in Australia & the U.S.A., UES Seating has curated a collection of seating, furniture & accessories delivering to projects around the world.

A handwritten signature in black ink that reads "Alex Morcos". The signature is written in a cursive, flowing style.

Alex Morcos
Managing Director

DESIGN • MANUFACTURE • SUPPLY

DESIGN

The engineering team at UES are passionate about high quality design and outstanding production. The team support specialised projects and regularly collaborate with customers to develop new solutions. With an in-house prototyping workshop and access to UES' production facilities, UES confidently supports technical projects on a regular basis.

Testing UES Seating products to 6G in Melbourne

MANUFACTURE

Through perpetual investment in new machinery, and partnering with leading manufacturers, UES achieves ISO 9001 certification, representative of the highest standards of production. UES has fully owned production facilities in Australia, the USA, Asia, and leading manufacturing partners around the globe.

The UES (USA) INC owned production facility in Washington DC

SUPPLY CHAIN & LOGISTICS

Customer focused fill rates with consistent on-time delivery is UES International's primary focus. Investment in sophisticated programs to ensure high level fill rates, to maintain ISO 9001 requirements, and support customer requirements for reliable product availability and on time deliveries.

UES Distribution Centre in St Marys NSW

UES is proud to be an ISO 9001 certified company

FEATURES

CHPL1-6 - 1.6m length
 CHPL2-0 - 2m length
 CHPL2-3 - 2.3m length
 CHPL2-5 - 2.5m length
 CHPL3-0 - 3m length
 CHPL4-7 - 4.7m length

An established concept in hinge design. Centaflex is a stylish, one piece, continuous hinge developed taking full advantage of the latest advances in new materials and manufacturing technology.

The membrane of the Centaflex hinge is a flexible resin comprising of a patented blend of polyester elastomers combining the high strength of engineering resins with excellent flexibility. The result is that the Centaflex hinge has an excellent flex-life at temperatures ranging from -40C° to 50C°.

During the manufacturing process; co-extruded rigid P.V.C profiles are fused together with the molten, Centaflex hinge membrane creating an extremely strong and resilient hinge. For example a one metre length fitted horizontally has a S.W.L of 100kgs.

Centaflex is a well designed hinge offering many advantages over conventional continuous hinges currently available. Just look at the list of features Centaflex hinges offers.

- Durable - tested to over 50,000 operating cycles.
- Secure - interlocking profile when closed.
- Maintenance free.
- Aesthetically pleasing-low exterior profile.
- Concealed fixings.
- Easy to fit.
- Weatherproof continuous seal.
- Corrosion resistant.
- U.V light stabilised.
- Excellent flex life.
- Competitively priced.

Three Way Slam Latch

3-18342

MATERIAL

Steel

FINISH

ZP

FEATURES

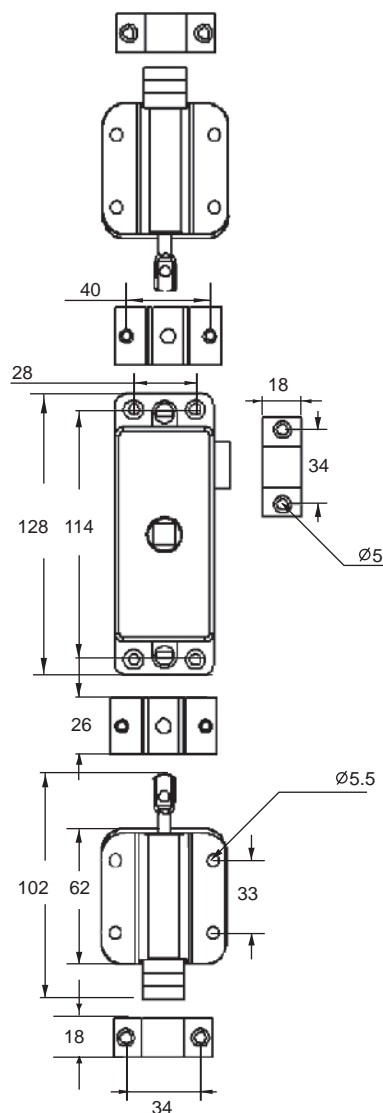

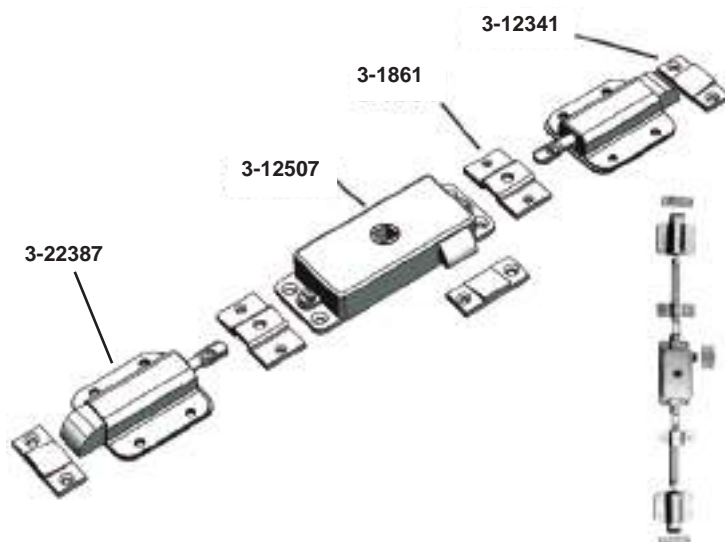

This system uses standard end-latches together with a three way mechanism and separate connecting rods. In operation, the three slam bolts act together, and are withdrawn simultaneously as the handle rotates centre follow-bush.

The assembly as shown is suited for a right-side door (outside handle turns clockwise to unlatch) but can be turned upside-down to fit left-side installation, in which case direction of handle rotation will be reversed.

Angle of movement, outside handle 40*.
Yellow zinc-plated finish throughout. Bolt spring pressure: initial, 3kg, final 6kg.

The complete assembly of 3-18342 includes all items shown.

Latch is shown as mounted on inside of panel, usually on right-side doors.

2 Way Rod Latches

3-18794(5'), 3-18794(6'), 3-18794(8')

MATERIAL

Steel

FINISH

ZP

FEATURES

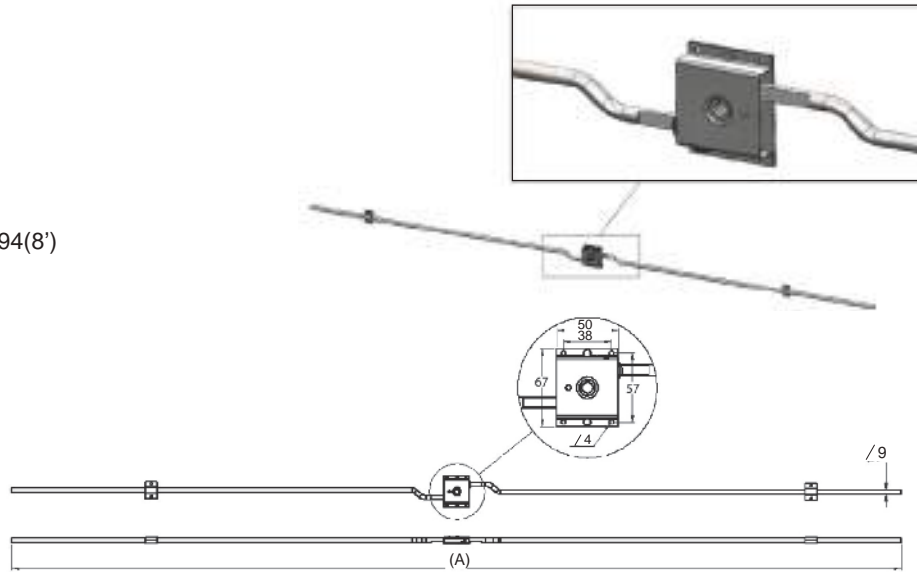

RH - 3-18794(5'), 3-18794(6'), 3-18794(8')

DIMENSION (A)

3-18794(5') - 1525mm

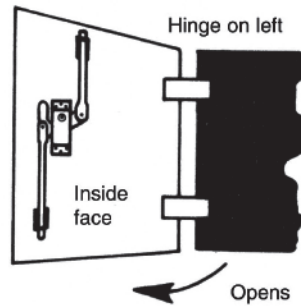

3-18794(6') - 1865mm

3-18794(8') - 2490mm

This design is an industry- standard for securing large doors requiring latching on two edges. This is a 'deadbolt' system with 10mm diameter rods driven by centre bush, and held extended by action of a strong spring. Right-hand and left-hand models are available with many special options.

Maximum throw of rods 24mm each. Angle of movement, outside handle 90°. Zinc-plated as standard finish.

Note on 'handing'

Sketch shows left side latch in position on interior of door which is hinged on its right-hand edge (when viewed from outside). Latches operate identically except for direction of rotation of follow-bush.

2 Way Rod Latches

3-18238, 3-18254

MATERIAL

Steel

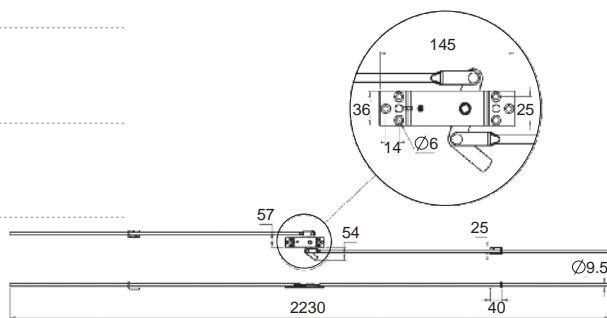

FINISH

ZP

FEATURES

RH - 3-18238

LH - 3-18254

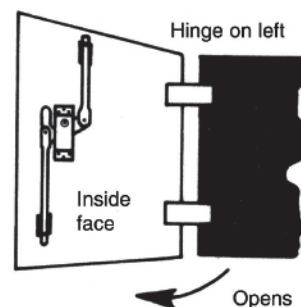

This well-proven 'dead-bolt' rod system is equally suitable for vehicle or industrial use. With 9.5mm diameter solid rods and heavy-gauge fabricated steel construction, it will withstand rough treatment and provides full 3-point security.

Latches are supplied complete with guides and keeper, and standard 1143mm rods which can be cut to length by the customer. Note that the system is 'handed', left handed or right handed as illustrated.

Dimensions given will assist in application:

Note that latches are 'handed', and that the keeper must be placed slightly above the line of centre-mechanism.

Special versions are available, with rods made to particular lengths, cranked or tapered. Centre bolt can be removed to provide a 2-way system if desired.

Note on 'handing'

Sketch shows right side latch in position on interior of door which is hinged on its left-hand edge (when viewed from outside). Latches operate identically except for direction of rotation of follow-bush.

Centre latch in 4mm steel construction. Maximum throw of rods 33mm (at top and bottom)

Angle of movement, outside handle 60°.

Finish: Yellow zinc-plated as standard.

External-Fix Grab Handle With 'Snap-Shut' Trim Panels

Strong, lightweight, attractive. Plant-on fixing, secured with bolts into slotted holes, integral cover panels. Textured finish, normal colours with black and blue/grey. Other colours to special request. Moulded in polypropylene. See table for physical properties. Meets EC 95/28CE regulation for combustibility (less than 100mm per minute).

Load testing

Tests carried out by an independent proof house gave the following results (at 15 °C)

Parallel to fixing: Max load 306kg before handle pulled away from bolts.
Vertical to fixing: Max load 126kg before handle pulled away from bolts.
With ultimate strength over 300kg we recommend a safe working load of 100kg max.

Physical Properties of Polypropylene

Izod/impact strength at 23°C	9.5kj/m ²
Embrittlement temperature	-20°C
Heat distortion temperature (4.6kg/cm ²)	95°C
Melting range	165-175°C
Burning rate (3mm) thickness	23mm/minute
UL94 Flammability rating	UL94HB
Resistance to ultraviolet light	After long exposure, some loss of pigment but no detrimental effect on strength

Moulded Grab Handle

GHBO-PB2, GHBO-PY1

MATERIAL

Steel with Polyurethane coating

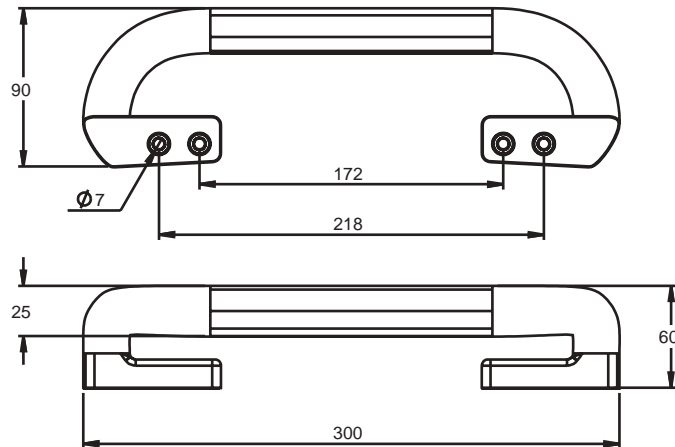

FINISH

GHBO-PB2 - Black Polyurethane coating

GHBO-PY1 - Yellow Polyurethane coating

FEATURES

Moulded in expanded polyurethane foam, this handle has a soft, resilient surface with no sharp edges, while the steel core provides strength and rigidity. This modern design replaces traditional steel stanchion rails and ensures safety and comfort when used as a grab, or entry-assist rail.

Product Features

- | | |
|---|---|
| <ul style="list-style-type: none"> ■ Soft, padded surface. ■ No sharp edges, for maximum safety. ■ Triangular section for good grip. ■ Mounting holes concealed by snap-in plugs. ■ Attractive textured finish. Standard colours are black, red and yellow. Other colours can be moulded subject to batch - quantity requirements. | <ul style="list-style-type: none"> ■ Fixing by bolting through four holes in steel core. Handle cannot be 'flexed'. ■ Moulded in expanded polyurethane foam around solid, 10mm steel rod. Meets EC 95/28/CE regulation for combustibility (less than 100mm per minute). |
|---|---|

Load Test Data

Tests carried out by an independent proof house gave the following results;

Parallel to fixing: load 3.70 Kilo-Newtons (377kg) before distortion.

Vertical to fixing: load 3.56 Kilo-Newtons (363kg) before distortion. With ultimate strength over 1 tonne we recommend a safe working load of 250kg (550lbs) max.

Electronic Control Unit for Central Locking

22316-01

This electronic system consists of compatible components that allow for keyless entry for on or off road equipment.

This system is perfect for any vehicle that doesn't currently have central locking capabilities.

This unit comes with 22311-01 FOB as standard. 22316-01 unit will operate up to 60 control FOBs (remotes) and up to 20 door locks.

4 signals are emitted from each control FOB. Examples of use could be:

- 1) Lock all
- 2) Unlock all
- 3) Operate Zone A or Lighting
- 4) Operate Zone B or Generator etc.

Installation instructions available upon request

22316-01

FEATURES

- Increased end user convenience
- Easy and intuitive to operate
- Increased vehicle security
- Lighting and auxillary output control
- Complete kit with wire harnesses and accessories
- Standard 12V power

Use with:

- 36157-01 Actuator
- 19583-08 Lock
- 22676-10 Lock
- 29412-07 / 31703-05 Complete Lock
- 29790-04 / 15605-01 Complete Lock

Flush Paddle Latch - Weatherproof

PL140, SL55-SS

MATERIAL

Steel / Acetal Copolymer

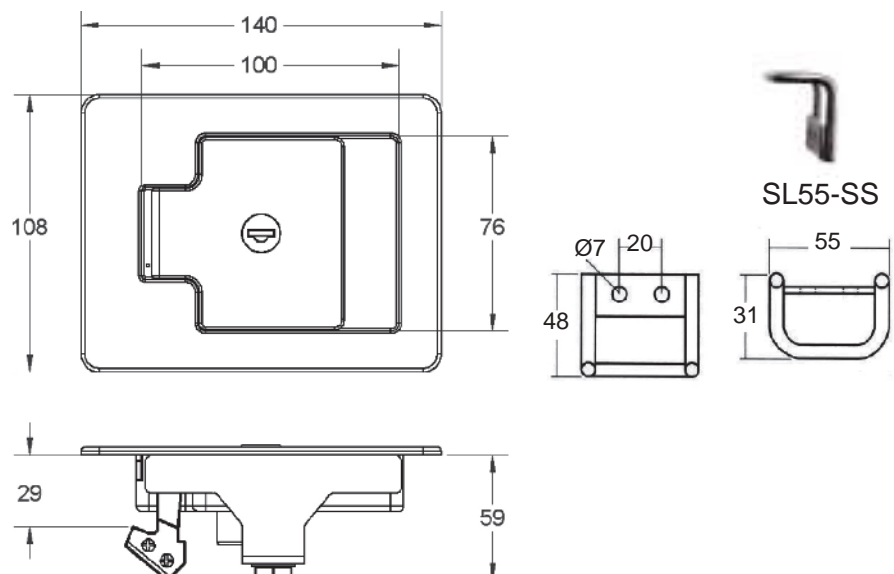

FINISH

Black

FEATURES

SL55-SS - SS striker plate sold separately

The traditional paddle handle has been completely redesigned to make major improvements in function and specification. This new model will not corrode, will resist entry of water and is quickly installed without visible bolts or rivets.

Recessed Paddle w/ Rotor Latch

Two Stage Rotary latches

18610-01, 18611-01

MATERIAL

Casing: High Strength Steel
 Springs: Non Corrosive Stainless Steel

FINISH

Casing: Zinc Plated
 Springs: Raw

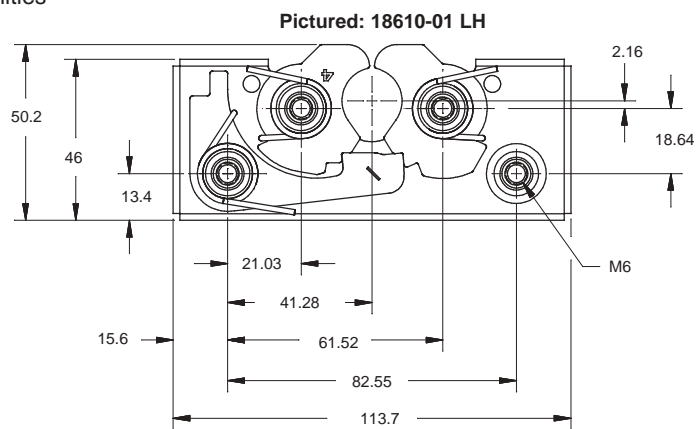

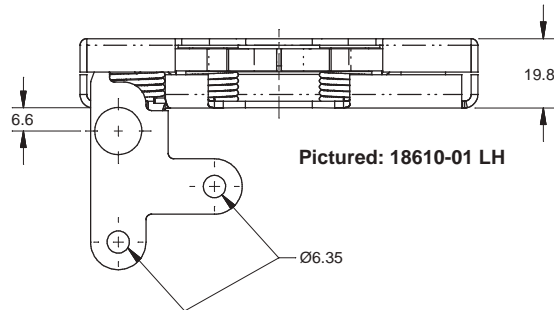

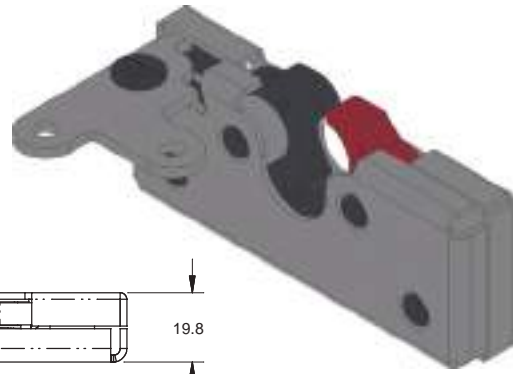

FEATURES

18610-01: Left Hand
 18611-01: Right Hand

Two Stage Rotary latches
 Used with pin SP44

These latches can be used with any lock that has 2 or 3 way latching capabilities

These latches are suitable for doors up to 91kgs

Striker Pin

SP44

MATERIAL

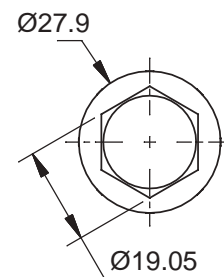

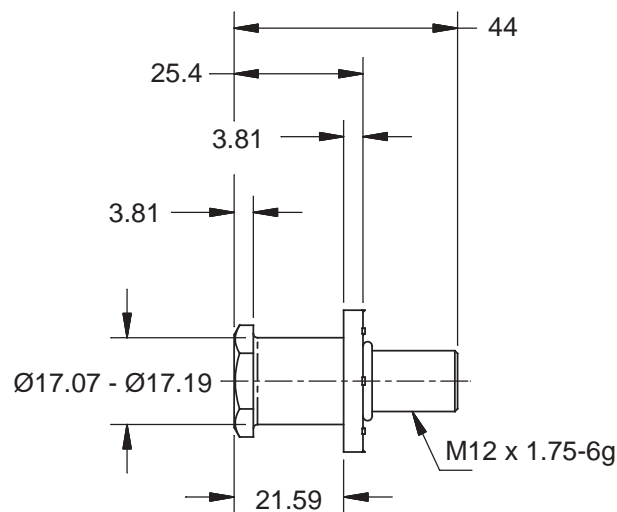

Steel

FINISH

Zinc Plated

FEATURES

Use with Rotary Latches
 18610-01: Left Hand
 18611-01: Right Hand

Rotor Latches

RL92LH, RL92RH

MATERIAL

Steel

FINISH

ZP

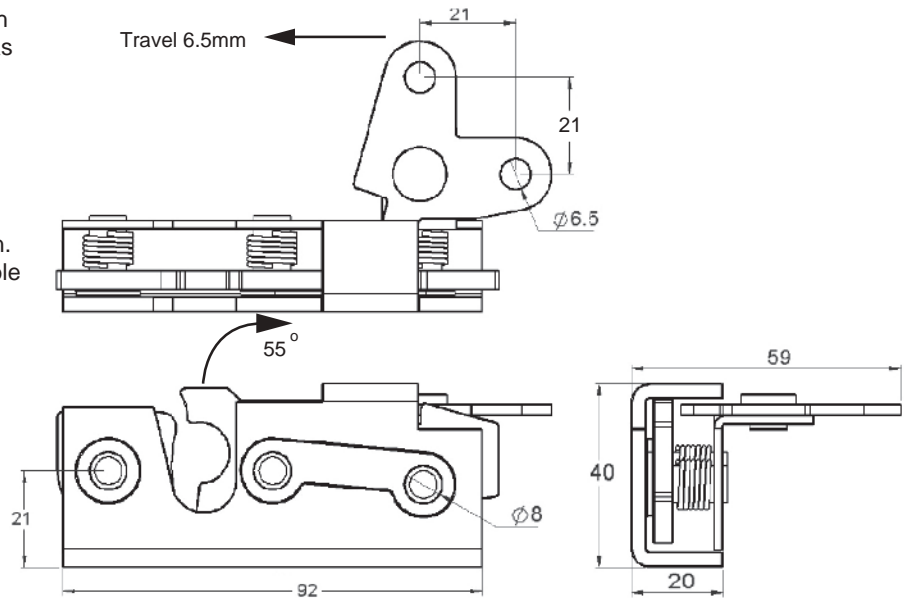

FEATURES

Slam-action against striker pin, both 'hands' available. Claw engages pin with 2-stage action, and is released by pull as shown on 2-lobe actuator arm. Clear zinc-plated throughout.

Anti-Burst Properties

When ring-tested, these latches can achieve values in excess of 8-9 KN* transverse load in fully latched condition. However, vehicle builders are responsible for evaluating performance in their own particular application and for ensuring that appropriate legislation is satisfied.

*SAE & ECE11 Specification

Rotor Latch Striker Pin

Moulded Slam Latch w/ Pull Knob

SL80MLD-K, SL80MLD

MATERIAL

Acetal Copolymer

FINISH

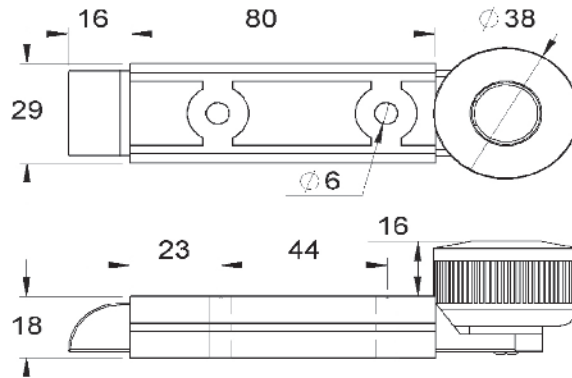

Black

FEATURES

The unique design of these latches allows 'fix through' mounting to suit narrow door pillars, sections and channels. Moulded construction provides the benefits of light weight, self-lubricating action, and total corrosion resistance at an inexpensive price.

Note: Knob & rivet can be supplied loose, for assembly after latch is installed in panel.

SL80MLD-K Moulded slam latch, pulled knob fitment
 SL80MLD Moulded slam (no knob)

Refrigeration Door Lock

RDL-F - with Flush Striker

MATERIAL

Zinc Diecast

FINISH

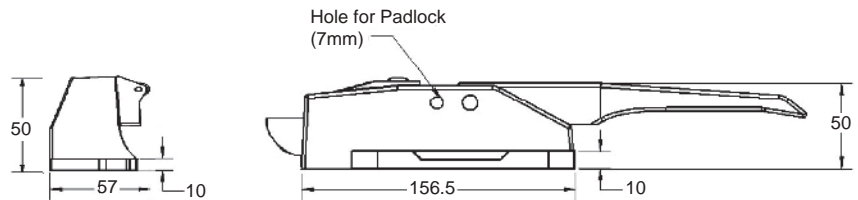

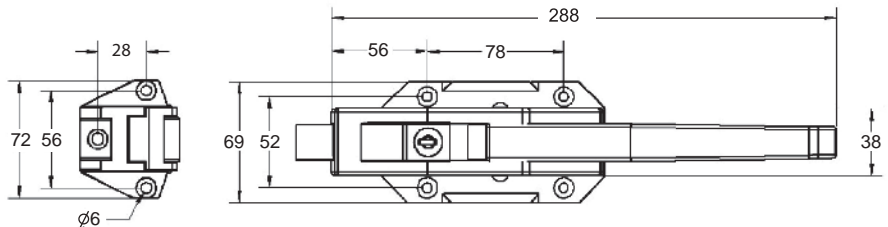

Chrome Plated

FEATURES

Chrome slam latch with offset striker adjustable in 2.5mm increments and inside release handle.

This latch is widely used for large size insulated enclosures, such as cold stores or containerised units, where a surface-mounted latch is preferable to avoid breaching the integrity of the door.

With slam action against a roller striker, this system can be used on doors flush fit against the frame or offset between 35-70mm height. There is an inside safety 'punch' handle for emergency release.

Stainless steel quarter-turn fastener for applications where high corrosion resistance is required. Acid proof steel quality for extreme environments.

Gas Struts

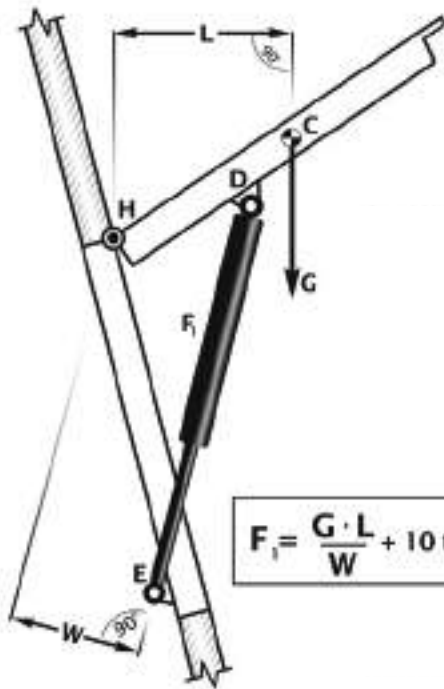

Tips on Correct Installation of Gas Struts

- Always install after painting, welding etc.
- The gas strut should always be fitted with the piston pointing down.
- Temperature range -30C to +80C
- Use suitable end fittings and angle joints to avoid coupling jamming.
- Gas struts are maintenance free, do not grease or lubricate shaft.
- Install without twisting.
- Avoid lateral forces.
- Protect piston against dirt, paint or damage.
- Output forces will vary approximately 4% for every 10C change in temperature.

$$F_1 = \frac{G \cdot L}{W} + 10 \text{ to } 15\% \text{ safety factor}$$

- C Centre of gravity
- D Moveable pivot
- E Fixed pivot
- H Hinge
- G Weight
- L Horizontal distance from centre of gravity to hinge
- W Effective lever arm of gas strut = smallest distance gas strut = hinge E
- F₁ Force of gas strut

UES international have a complete and comprehensive range of gas struts, fittings and brackets available through our entire branch network.

Whether it be for Transportation, Automotive, Camping, Domestic or Industrial use we have the product suitable for almost all requirements.

With an extensive range of lengths and pressures in all branches and the availability of strut gassing machines means a fast turnaround time and the ability to provide struts to your exact requirements.

**UES Gas Struts have a 2 year warranty from date of Invoice.*

135°	100	146	369

Telescopic Support Stay

7-3099, 7-03098

MATERIAL

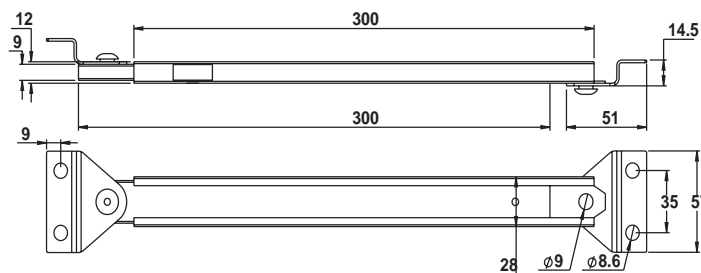

Steel

FINISH

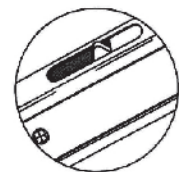

ZP

FEATURES

290/495mm
7-3099 - Bottom bracket only.
7-03098 - 2 Brackets.

BRACKET

Detailed view of 'star wheel' area.

Support Stays 'Star-Wheel' Release

This range of extensible stays provides a simple, inexpensive and long-lasting method of supporting top-hinged doors and hatches. The 'star-wheel' design allows automatic release - useful where two stays are fitted on a very wide panel. Many options are available.

Features:

- Stay extends as door is opened and locks in the extended position. It is automatically released by a further slight extension, allowing unit to be closed.
- Clear zinc-plated. To special order, yellow passivate or black zinc-plated.
- Standard brackets (7/03094) as illustrated for plant-on fitting.
- Mild steel throughout.

Telescopic Support Stay "Safety Catch" Release 7-25621

MATERIAL

Steel

FINISH

ZP

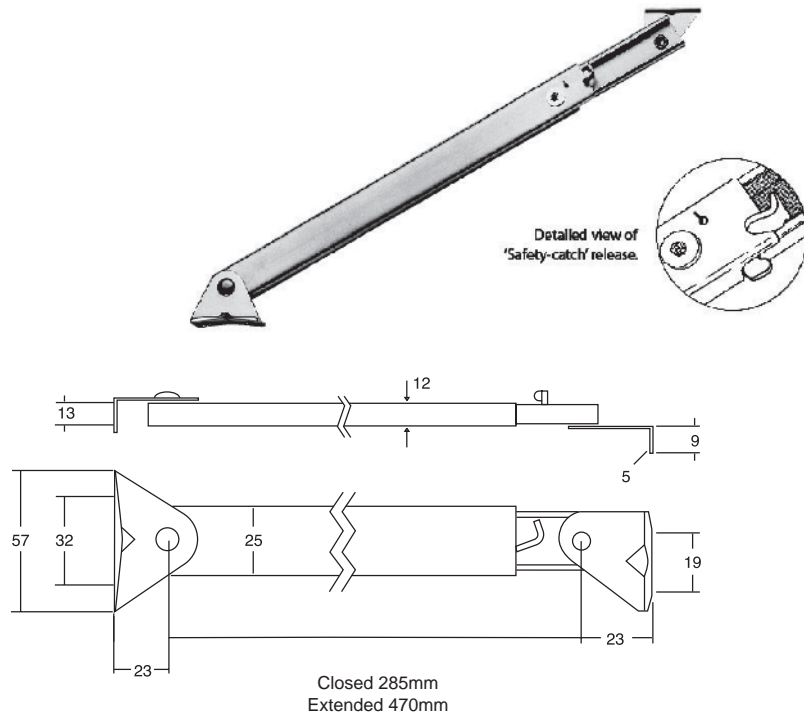

FEATURES

285/470 mm
2 x Brackets

This standard model is representative of a family of stays for top-hinged doors and hatches. The 'safety-catch' design means the stay must be manually released - a useful precaution against vibration or accidental closure.

Features include:

- Stay extends as door is opened and locks in the extended position. The safety catch must be depressed manually before it will close.
- Clear zinc-plated. To special order, yellow passivate or black zinc-plated.
- Standard brackets as illustrated for plant-on fitting.
- Mild steel throughout.

Lid Stay w/ Catch RH & LH S-20R, S-20L

MATERIAL

Steel, Brass, Nylon (Washer)

FINISH

Chrome

WEIGHT

125g

FEATURES

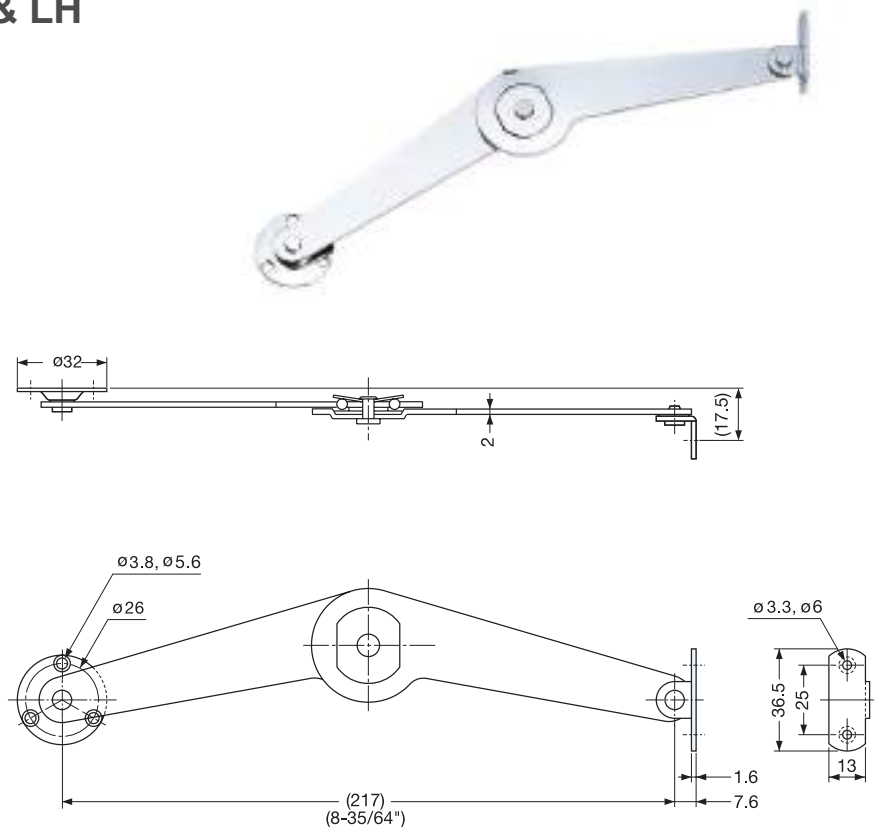

Lid stay with ball catch for light weight door.

Catch automatically holds lid in opened position.

Can be installed individually or in pairs.

S-20R: Right Hand

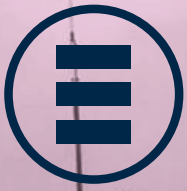

S-20L: Left Hand

Rubber

UES
international

INSERTION RUBBER

Natural Rubber Insertion is a economical, general purpose rubber manufactured from natural rubber compound that is reinforced with a woven cotton insertion as standard This reinforcement increases the tensile strength of Natural Rubber Insertion and allows it to be used in a range of sealing, wear pad, skirting and lining applications.

Black in colour Natural Rubber insertion has good resistance to mild acids and alkalis and moderate resistance to ozone. It is not well suited to use with oils and/or hydrocarbons. It is typically used in applications where temperatures range from -50°C to 90°C and has good edge tear resistance and abrasion resistance coupled with reliable and controlled elasticity.

NEOPRENE

Neoprene rubber is an economical form of rubber sheet with good weathering, abrasion and heat resistance and moderate resistance to oil and petroleum products. This rubber material is used for all kinds of gasket, seal, wiper and wear protection applications due to its good all-round properties and long lasting performance. Neoprene rubber is black in colour and has a hardness of 60 (± 5) Shore A. It is typically used in applications with temperatures up to 90°C

EPDM

Fitch's EPDM rubber is a high quality, premium grade synthetic rubber made from 100% EPDM polymer. This material is specifically designed to exhibit excellent weather and UV resistance coupled with an ability to perform in temperatures up to 130°C. EPDM rubber has good resistance to a wide range of chemicals (acids, alkalis) though it is not recommended for use with oils or hydrocarbons. These properties lead to EPDM's selection as a sealing material for chemical installations as well as for installation outdoors.

NITRILE

Nitrile Rubber, also known a Nitrile Butadiene Rubber or NBR, is a versatile sealing material commonly used in applications where it is expected to seal oils, fuels or hydrocarbons as it displays excellent resistance to all. Nitrile rubber also possesses generally good mechanical properties, such as abrasion resistance and tensile strength as well as good ageing characteristics.

It is also used in applications where temperatures fall between -30°C and 120°C. It has limited resistance to polar liquids such as ketones, ethers or amines and is not recommended for use with concentrated acids. Nitrile also has poor resistance to ozone. Nitrile Rubber is black in colour and has a hardness of 60 Duro (Shore A.)

WHITE NITRILE

White Nitrile is a multi-purpose synthetic food grade rubber compound that meets FDA requirements. It is suitable for use with alcohols, mineral oils, animal and vegetable fats.

Primarily it's used for seals and gaskets in the food and pharmaceutical industries. It is non-marking, non-toxic, and non-allergenic. It has general resistance to most hydrocarbons, fats, oils, grease, hydraulic fluids, chemicals & solvents.

PURE GUM

Pure Gum is usually Tan or Black, and is made by using an organic material. Pure Gum is typically used in areas where tensile and temperature (-40° to +160° F) are a concern, but longevity isn't. Pure gum is also very resilient by not holding a shape and the pure gum rubber is also self-healing. Pure gum rubber is primarily used in sand blasting booths. Pure gum rubber is also used in seals, drum pads, gaskets that require bounce and stretch capability.

CHUTEX

Chutex Rubber is a highly elastic, highly durable grade of premium rubber with a hardness of 40 (Shore A). This long-lasting rubber is renowned for offering excellent resistance to tearing, abrasion and cutting which has led to its widespread adoption for lining, wear protection, curtaining and skirting applications. With a combination of high strength, excellent flexibility, good seal ability and outstanding wear resistance; Chutex Rubber is a popular choice for a wide range of demanding industrial applications. Chutex Rubber is used in applications where temperatures are between -20°C and 70°C. It has a minimum tear strength rating of 60 N/mm (ASTM D624), a minimum tensile strength of 18 MPa (ASTM D412) and a minimum elongation at break of 550% (ASTM D412).

SILICONE RUBBER

Silicone Rubber is available in both a red and translucent. Both are premium quality elastomers that combine high temperature resistance with excellent elasticity and seal ability. Used with a wide range of chemicals, Silicone Rubber also exhibits excellent electrical insulation properties and resistance to UV and weathering.

Silicone Rubber is typically used in applications where continuous temperatures are between -60°C and 220°C continuous and up to 260°C intermittently. It has a minimum elongation of 175%. The standard grade of Silicone Rubber has a Durometer hardness of 60 (±5) Shore A though a number of other hardnesses are available upon request.

High Bond Double Sided Tape

High Bond Acrylic Tape

Typical Applications

Bonding of panels where high bond is required

Black

HBT0112A: 12mm wide x 1mm thick x 25m roll

HBT0119A: 19mm wide x 1mm thick x 25m roll

HBT0125A: 25mm wide x 1mm thick x 25m roll

HBT0212A: 12mm wide x 2mm thick x 18m roll

HBT0225A: 25mm wide x 2mm thick x 18m roll

Temperature Resistance

Short Term: up to 220°

Long Term: up to 120°

Buffers With Aluminium Extrusion 4282401, 372-0226, 376-0245

4282401

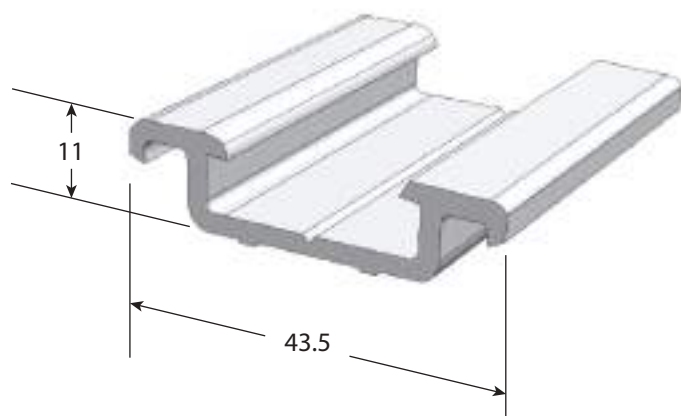

EPDM material, 70Sh. **Weight:** approx. 550g/m.

Sales Unit: 25 metres.

To be ordered separately:

Mounting moulding aluminium base 372 0226.

End piece 376 0245.

372-0226

Aluminium extrusion. Mounting moulding. AlMgSi 0.5 F22, bright extruded in lengths of 4 metres. **Weight:** 390 g/m.

376-0245

End caps narrow section. End cap for 372 0226 with 428 2401 GK AlMg 3, chill casting black, powder coated. **Weight:** 25g each.

MULTICUSHION MOUNTS - STUDS

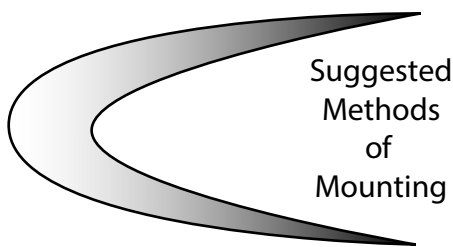

The MULTICUSHION system is a new approach to isolator selection. The large range of sizes and durometers combined with interchangeable metric and imperial studs allows selection of the most appropriate cushion isolator for the application

First choose the best cushion for the application and then choose the desired stud combination.

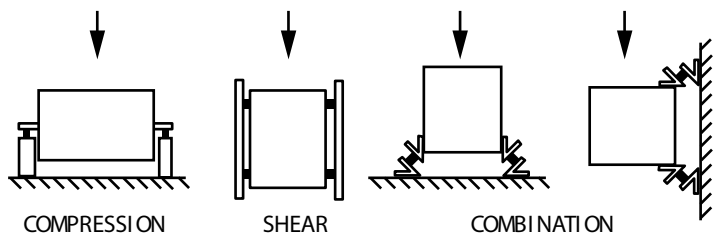

MULTICUSHION isolators are made from high-grade natural rubber and all metal surfaces are passivated to automotive OEM standards. The interchangeable studs are easily inserted with a screw driver whilst the microBOND™ 'fastener adhesive system' provides secure thread locking.

Note! Multicushions are not recommended for use under permanent tension loading. Ensure load is applied to full face and not just on the thread.

Suggested Methods of Mounting

FLANGE ISOLATORS

These special isolators were developed to meet almost every type of machinery installation within the loading range, with telescopic metal inserts providing considerable stability in all directions. The two light duty isolators, M110 and M114 are equipped with upper metal inserts, tapped to receive standard bolts or set screws. The isolators can be fastened to the floor or other base, with bolts through the two lugs of the lower metal stamping. When using the heavy duty isolators M139 and M140, loads can be suspended as well as supported.

Interlocking flanges incorporated in M139 and M140 isolators ensure suspension even if the rubber is completely destroyed by fire, etc.

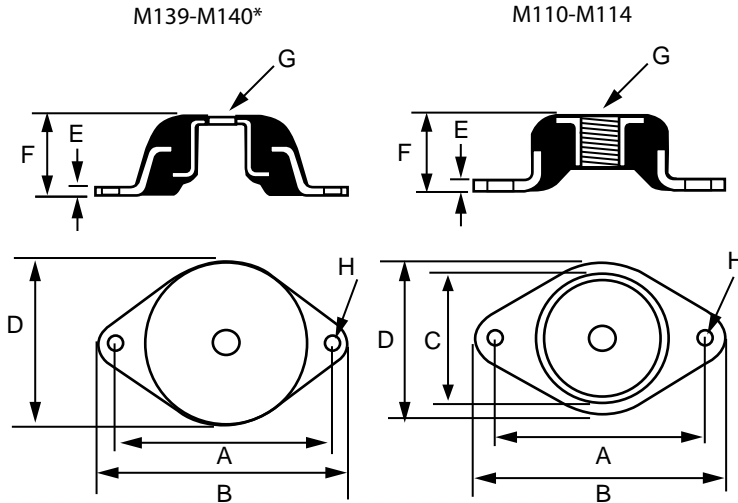

M139-M140*

M110-M114

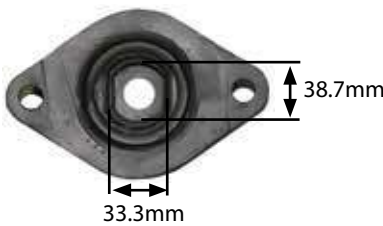

* ALSO AVAILABLE IN STAINLESS STEEL

FLANGE ISOLATORS

To assist the isolation system designer we have provided the approximate deflections of Mackay isolators at various static loadings. It therefore becomes a simple matter to obtain the isolation efficiency by referring to the Mackay graph on "disturbing frequencies/deflections" (Shown in our current Flexible Isolator Catalogue). If you require any further technical data on Mackay isolators, please contact the Mackay Technical Department.

CONFLEX ISOLATOR

CONFLEX FOOT ISOLATOR

The Conflex Foot Isolator is similar in style to our existing range but is supplied minus the two holed fixing flange. Designed as a free standing isolator for use under a wide range of equipment it requires no fixing to the floor, simply attach to the equipment and lower into position

Typical applications include:

- Small portable Petrol / Diesel driven equipment
- Pumps
- Air conditioning units

CONICAL BUFFER

For inexpensive and effective control of machinery vibration, shock and acoustic noise.

These buffers are used for controlling impact and may be used as snubbing rubbers when excessive shock loads are encountered in resiliently mounted equipment.

FEATURES

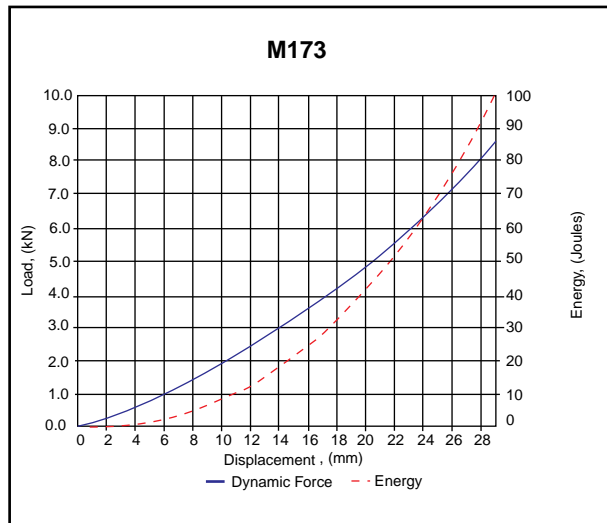

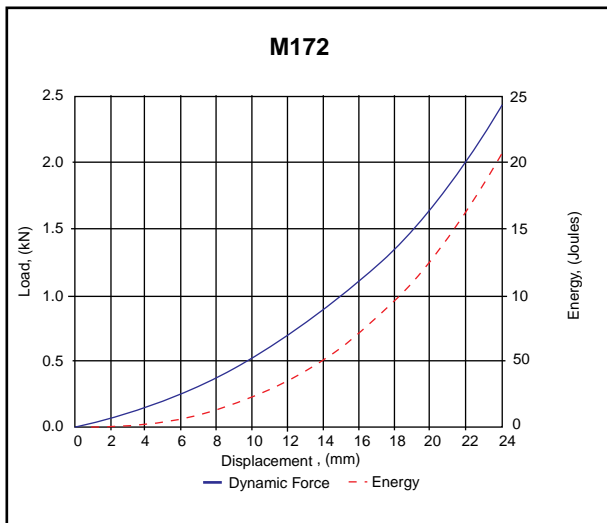

Designed specifically to control impact and torque reaction loads.

*Uses Multicushion Studs

MULTIBUFFER

Including Multibuffer stainless

Multibuffers are designed for inexpensive and effective control of vibration shock and acoustic noise and are equally adaptable in controlling impact or for use as simple machine feet.

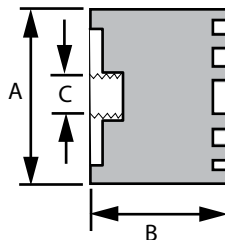

The Multibuffer face profile has been designed to provide a simple slip resistant surface whilst maintaining optimum impact and static properties

Uses Optional Stud System! (not available with stainless steel)

DESCRIPTION

All Island Inflatable boats IA models come with Island's patent Double Wall High Pressure Air-Deck Flooring. The advantages of an air

floor are its lightweight design and ease of use. You can roll up or unroll your boat easily without having to remove or install the floor.

ISLAND INFLATABLE, AIR DECK FLOOR

PRODUCT NUMBER

IA230 - 2.3m

DESCRIPTION

All Island Inflatable boats IA models come with Island's patent Double Wall High Pressure Air-Deck Flooring. The advantages of an air

floor are its lightweight design and ease of use. You can roll up or unroll your boat easily without having to remove or install the floor.

ISLAND INFLATABLE, AIR DECK FLOOR

PRODUCT NUMBER

IA260 - 2.6m

DESCRIPTION

All Island Inflatable boats IA models come with Island's patent Double Wall High Pressure Air-Deck Flooring. The advantages of an air

floor are its lightweight design and ease of use. You can roll up or unroll your boat easily without having to remove or install the floor.

ISLAND INFLATABLE, AIR DECK FLOOR

PRODUCT NUMBER

IA290 - 2.9

DESCRIPTION

All Island Inflatable boats IA models come with Island's patent Double Wall High Pressure Air-Deck Flooring. The advantages of an air

floor are its lightweight design and ease of use. You can roll up or unroll your boat easily without having to remove or install the floor.

ISLAND INFLATABLE, AIR DECK FLOOR

PRODUCT NUMBER

IA330 - 3.3m

DESCRIPTION

All Island Inflatable boats IA models come with Island's patent Double Wall High Pressure Air-Deck Flooring. The advantages of an air

floor are its lightweight design and ease of use. You can roll up or unroll your boat easily without having to remove or install the floor.

ISLAND INFLATABLE, WOOD FLOOR + INFLATABLE KEEL

PRODUCT NUMBER

IA290 - 3.65m

DESCRIPTION

All Island Inflatable IW models come with heavy duty marine grade plywood flooring. Each floor comes in several segments that join together

with aluminium connectors and aluminium side strengthening rails. Easy to assemble/disassemble and pack.

ISLAND INFLATABLE, WOOD FLOOR + INFLATABLE KEEL

PRODUCT NUMBER

IW330 - 3.3m

DESCRIPTION

All Island Inflatable IW models come with heavy duty marine grade plywood flooring. Each floor comes in several segments that join together

with aluminium connectors and aluminium side strengthening rails. Easy to assemble/disassemble and pack.

Side Underrun Protective Devices for All Makes of Trucks

Side Underrun Protective Devices prevent cars, motorcycles and pedestrians from entering under the sides of a trailer and being run over by the wheels.

Reduce Fuel Consumption

Through the use of side underrun protection devices, it may improve the aerodynamic performance of heavy vehicles and potentially reduce fuel consumption.

Ventilation

Rotary Vents

RV11B, RV11W

MATERIAL

ABS Plastic

FINISH

RV11B Black

RV11W White

FEATURES

This new design Rotary Vent is available in White (RV11W), and black (RV11B)

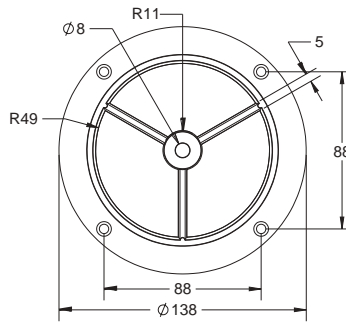

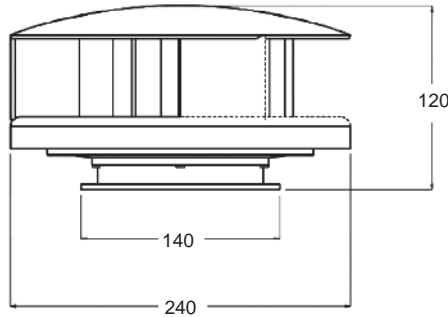

Improvements in design have increased the aerodynamic efficiency by up to 25%.

Independently lab tested (see test results).

Manufactured from high grade plastic (ABS), exceptional on transportation vehicles such as trains, buses, RVs, animal transport vehicles, delivery vans and marine vessels etc.

Corrosion resistant stainless steel centre shaft.

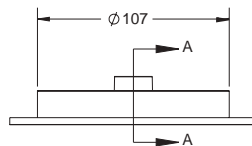

Registered design.

FRONT VIEW

Installation Instructions:

Remove moulded top cap, unscrew locknut and lift the top body from the base. This can now be attached to the outside roof, using rivets/screws into four countersunk holes around a pre-cut 96mm hole in the roof panel. Re-assemble and ensure the locknut is fully tightened and the top cap is firmly replaced.

Inner-Vent Assembly for Rotary Vents RVINTKIT, RVGSK

MATERIAL

STV265, STV238, STV337

MATERIAL

Lid - Steel

Flange - Pressure Cast Aluminium

FINISH

Lid - Black

Flange - Raw

FEATURES

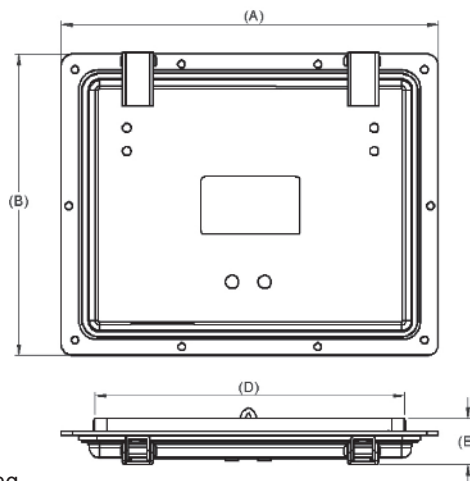

Lid: Black panned mild steel pressing formed to ensure rigidity and flatness.

Finger Pull: 3.5mm diameter, wire formed ring.

Mechanism: Unique coil spring action giving positive hold in both open and closed position. There is also considerable protection against 'over-opening'.

Flange: One piece aluminium pressure die-casting.

Weather Seal: Sponge rubber.

Heaters - Nordika

120-11-903

FINISH

Black

FEATURES

120-11-903 Nordika ED6, 24V **6 outlet**

Water heat-exchanger, aluminium box, 3-speed ventilator small volume.

Calorific Power: 12750 Kcal/h

Heating Power: 14.8 kW

Air Flow: 830m³/h

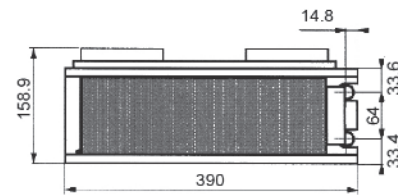

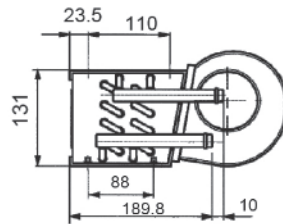

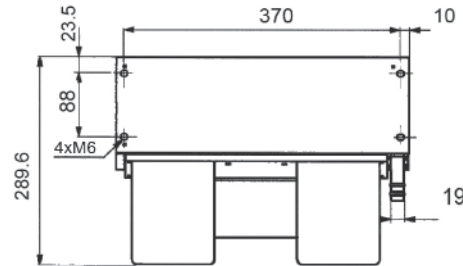

Electrical Power: 360W

Noise: 66dB

Weight: 5.2kg

Water Connect: dia 19mm

Handle: dia 55mm

Heaters - Kinox

120-16-110

FINISH

Stainless Steel

FEATURES

Kinox, 24V 4 outlet

If installed in the engine compartment, 2 air inlets are used to channel the sucked air from a healthy area

Stainless steel casing

4 x Ø55mm connectors for air outlets

Supplied with 2 x Ø80mm connectors and 2 x 95x95 covers to cover unused holes

Calorific Power: 8600 Kcal/h

Heating Power: 10 kW

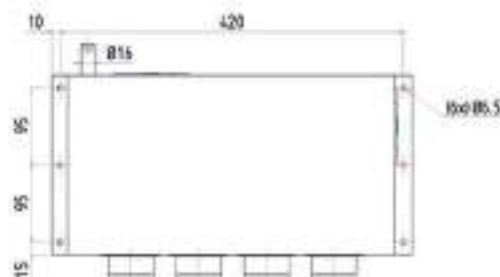

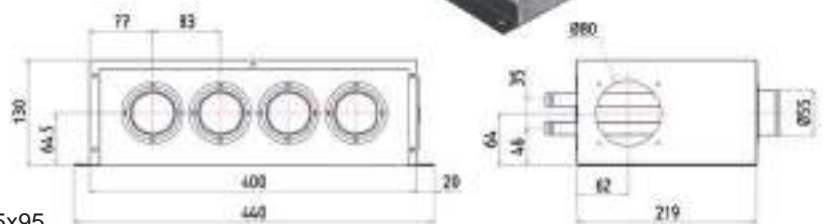

Air Flow: 520m³/h

Electrical Power: 180W

Noise: 69dB

Weight: 5.2kg

Water Connect: dia 16mm

Heaters - Silencio 2

120-14-030, 120-14-130

FINISH

Black

FEATURES

120-14-030 Voltage 12V

120-14-130 Voltage 24V

Water heat-exchanger, noiseless, 50 000 hour life expectancy and 2 speed ventilator.

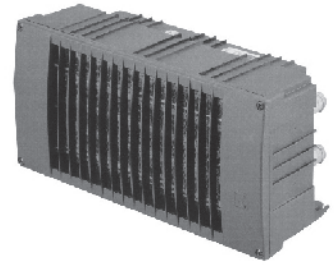

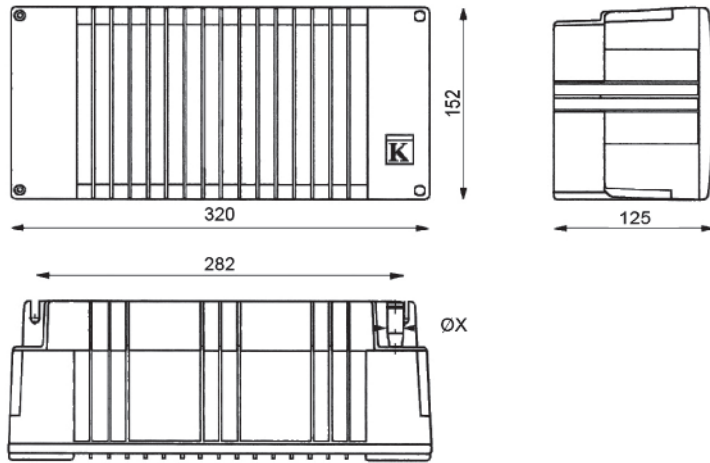

Air Flow: 250 m³/h

Calorific Power: 4800 Kcal/h

Heating Power: 535 kW

ØX: 16mm

Not all items held in stock. Please contact your local branch for more information.

Heaters - C.A.P.

120-13-100

FINISH

Black

FEATURES

120-13-100 Voltage 24V

Water heat-exchanger and 3 speed ventilator.

Air Flow: 420 m³/h

Calorific Power: 9300 Kcal/h

Heating Power: 10.8 kW

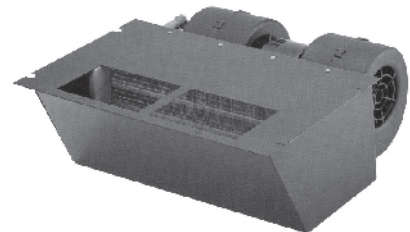

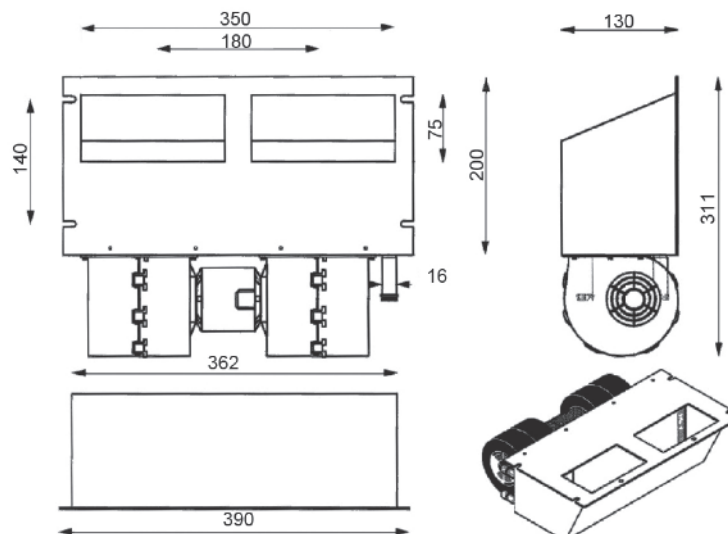

Electrical Power: 16 mm

Noise: 66 dB

Weight: 3.8 kg

Water Connect: Ø16mm

Not all items held in stock. Please contact your local branch for more information.

QDC Connector for Air Duct Pipe 40mm dia

340-24-060

MATERIAL

ABS Plastic

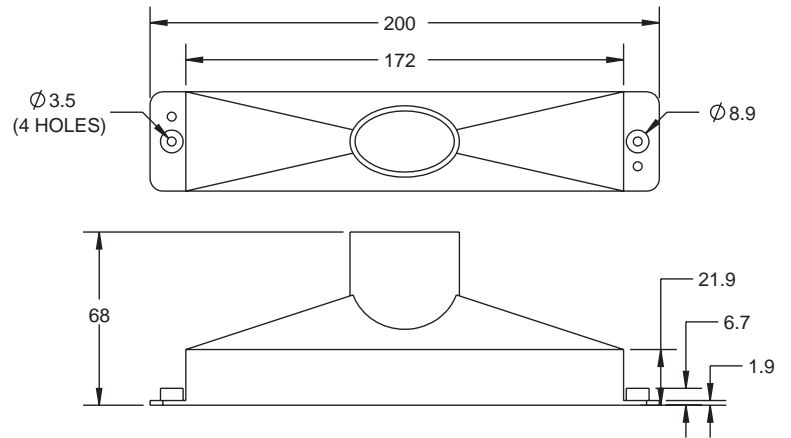

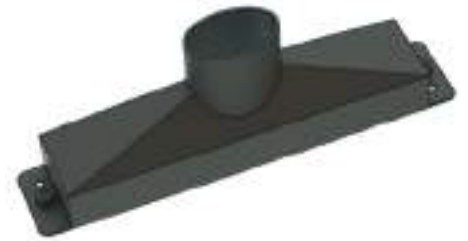

FINISH

Black

FEATURES

Remote control linear lever.

Side Underrun Protective Devices for All Makes of Trucks

Side Underrun Protective Devices prevent cars, motorcycles and pedestrians from getting under the skirt of a trailer and being run over by the wheels.

Get the Best SUP for Your Truck

Reduce Fuel Consumption

Through the use of side underrun protection devices, it may improve the aerodynamic performance of heavy vehicles and potentially reduce fuel consumption.

Spare Wheel Carrier - Wheel Easy TK3540

MATERIAL

Steel

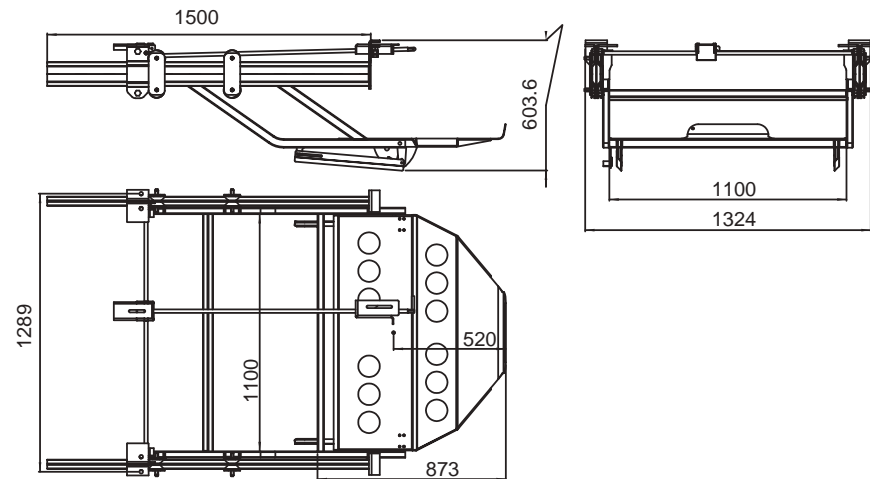

FINISH

Black Powder Coat

FEATURES

This is a single tyre carrier bracket that enables the operator to change a tyre without having to lift the wheel at all.

The Wheel Easy system has been designed with a focus on work place health and safety by eliminating any lifting of heavy wheels and tyres.

Tiger Hook Load Anchor TH2-5, TH6, TH12

MATERIAL

Steel

FINISH

ZP

FEATURES

- TH2-5:** 2.5 Tonne Tiger Hook
- TH6:** 6 Tonne Tiger Hook
- TH12:** 12 Tonne Tiger Hook

TH2-5

Dimensions: 105mm x 108mm
Eye diameter: 33mm

The tiger hook sits flush with the deck when not in use. Simply push down on the activating plate to raise the hook for use.

No frustrating build-up of dirt that exists with older, embedded anchoring systems. Genuine tiger hook drops dirt below the deck.

TH6

Dimensions: 103mm x 120mm
Eye diameter: 40mm

TH12

Dimensions: 139mm x 139mm
Eye diameter: 50mm

Electronic Control Unit for Central Locking

22316-01

This electronic system consists of compatible components that allow for keyless entry for on or off road equipment.

This system is perfect for any vehicle that doesn't currently have central locking capabilities.

This unit comes with 22311-01 FOB as standard. 22316-01 unit will operate up to 60 control FOBs (remotes) and up to 20 door locks.

4 signals are emitted from each control FOB.

Examples of use could be:

- 1) Lock all
- 2) Unlock all
- 3) Operate Zone A or Lighting
- 4) Operate Zone B or Generator etc.

Installation instructions available upon request

22316-01

FEATURES

- Increased end user convenience
- Easy and intuitive to operate
- Increased vehicle security
- Lighting and auxillary output control
- Complete kit with wire harnesses and accessories
- Standard 12V power

Use with:

- 36157-01 Actuator
- 19583-08 Lock
- 22676-10 Lock
- 29412-07 / 31703-05 Complete Lock
- 29790-04 / 15605-01 Complete Lock

Electronic Lock Actuator

36517-01

MATERIAL

High Impact Plastic

FINISH

Black

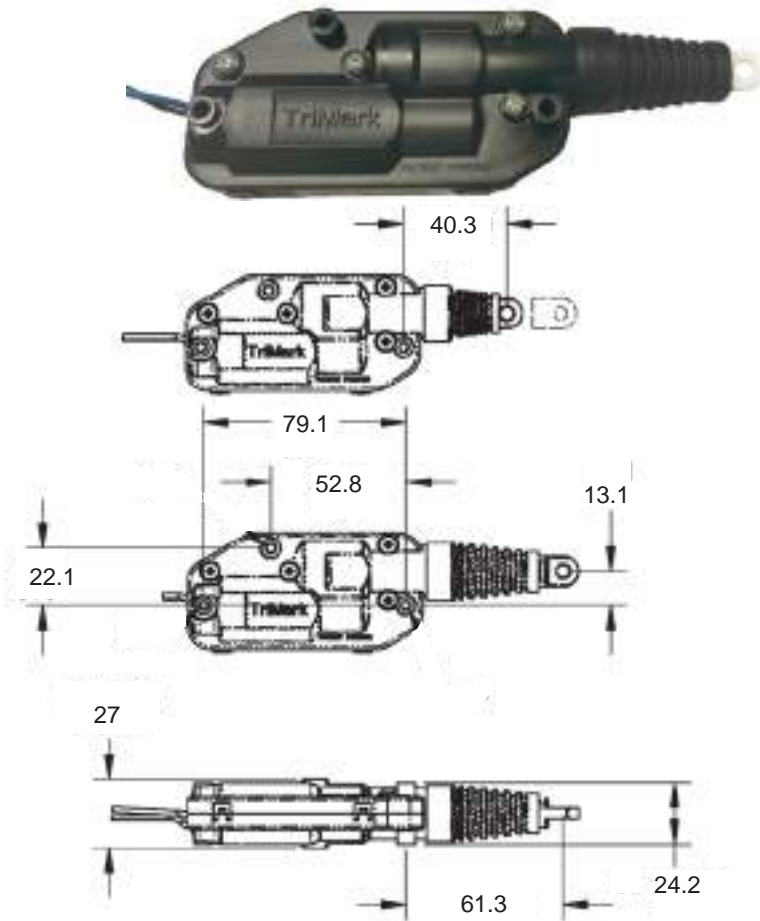

FEATURES

Electronic actuator for use on locks and handles to create central locking for the user

12V supply, drawing up to 4.0 amps.

Motor is equipped with a 12V thermal protection for excessive heating due to extreme usage such as rapid, frequent operations or sustained activation.

Wire length = 184mm

Mining & Construction Seating

T Back

The new T Back seat from UES is designed specifically for underground mining. This design allows the occupant to keep the safety gear attached to them as there is ample space around the hip area.

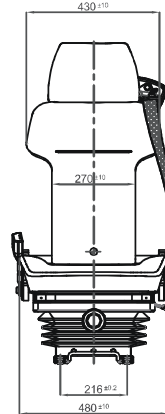

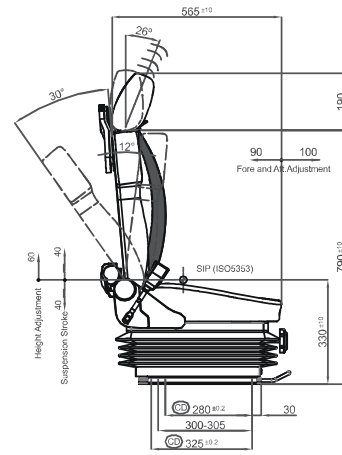

This new seat adds a comfort and strength to the T Back design

STANDARD FEATURES

- MECHANICAL SUSPENSION
- 150KG OPERATOR WEIGHT RATING
- HEIGHT INDEPENDENT WEIGHT ADJUSTMENT
- ADJUSTABLE SEAT ANGLE
- BLACK VINYL TRIM
- ADJUSTABLE BACK REST RECLINE

OPTIONS

- AIR SUSPENSION
- 12 OR 24 VOLT INTEGRATED COMPRESSOR
- LAP, LAP SASH SEAT BELTS
- TURNABLE
- OPERATOR PRESENCE SWITCH
- HEADREST

8018

The 8018 series seats are a low profile mechanically suspended seat designed for the materials handling sector. A heavy duty version is available for skid steers and other small machinery where space is at a premium.

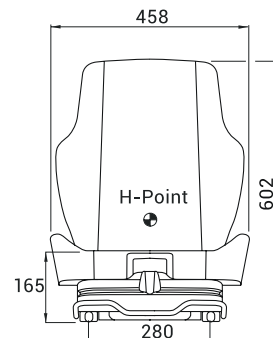

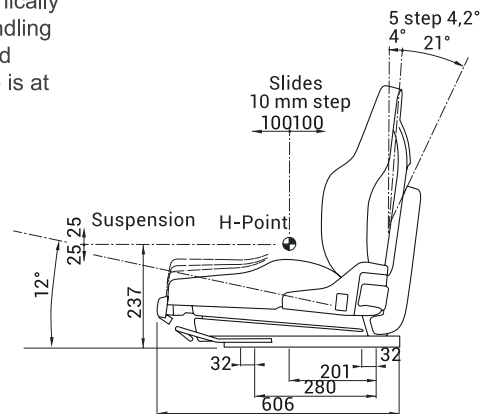

Supplied to the following OEM's Atlet, Toyota, Actil, Abeko, TCM

STANDARD FEATURES

- 40KG - 130KG OPERATOR WEIGHT ADJUSTMENT
- MICRO SWITCH
- LUMBAR SUPPORT
- BACKREST RECLINE
- HEAVY DUTY EXTRA FEATURES
- HEAVY DUTY DAMPER
- SEAT CUSHION ANGLE ADJUSTMENT

OPTIONS

- WATERPROOF TRIMS, CUSHIONS AND WORKING PARTS
- FLIP UP ADJUSTABLE ARMRESTS
- HIGH BACKREST
- ADJUSTABLE HEAD REST (ONLY AVAILABLE WITH HIGH BACK)
- ELECTRIC BUCKLE
- JOYSTICK CONTROL MOUNTING

7140

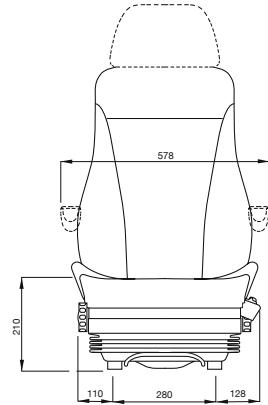

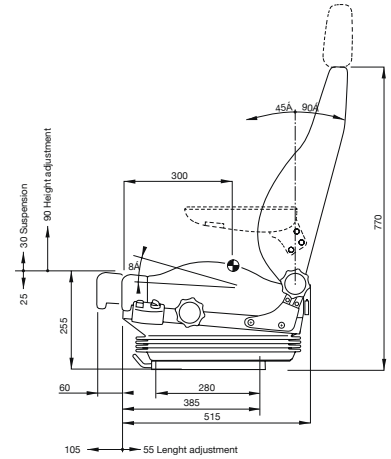

Fitted as original equipment by the following
John Deere, Timber Jack, Komatsu, Caterpillar,
Volvo CE.

STANDARD FEATURES

- STEPLESS AIR OPERATED HEIGHT ADJUSTMENT
- 150KG OPERATOR WEIGHT RATING
- LOW PROFILE SUSPENSION
- VARIABLE TOP RIDE ADJUSTMENT
- QUICK AIR RELEASE
- HEIGHT INDEPENDENT WEIGHT ADJUSTMENT
- ADJUSTABLE SEAT ANGLE
- ADJUSTABLE LUMBAR SUPPORT
- COMFORTLINE FOAMS
- VOGUE TRIM RATED AT 250,000 MARTINDALES

OPTIONS

- 12 OR 24 VOLT INTEGRATED COMPRESSOR
- LAP, LAP SASH, 4 OR 5 POINT SEAT BELTS
- TURNABLE
- OPERATOR PRESENCE SWITCH
- ARMRESTS

9150

The 9150 air operated suspension is specially designed for volvo articulated dump trucks.

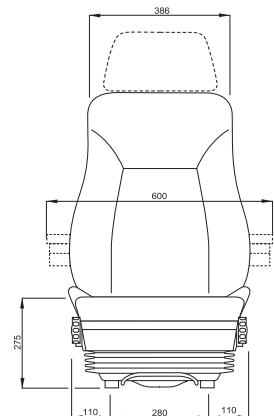

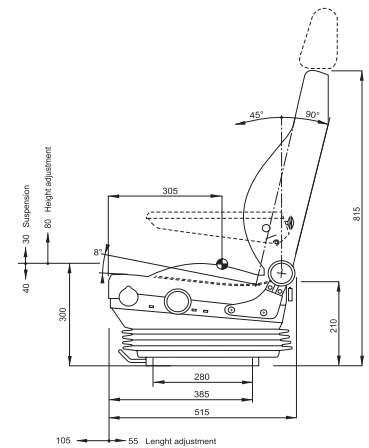

It is however a very comfortable and heavy duty seat that can be used in a wide range of construction and mining vehicles.

STANDARD FEATURES

- AIR OR MECHANICAL SUSPENSION
- 150KG OPERATOR WEIGHT RATING
- LAP RETRACTABLE SEAT BELT
- ADJUSTABLE SEAT ANGLE
- COMFORTLINE FOAMS
- VOGUE TRIM RATED TO 250,000 MARTINDALES
- QR BACKREST RECLINE
- ADJUSTABLE LUMBAR SUPPORT

OPTIONS

- LAP SASH BELT, 4 OR 5 POINT HARNESS
- ARMRESTS
- TURNABLE
- 12V OR 24V INTGRATED COMPRESSOR
- MID OR HIGH BACK
- HEADREST
- SEAT AND BUCKLE SWITCHES

UESB40

The new compact seat from UES is designed to fit into smaller machinery where cabin space is at a premium.

A robust mechanical suspension fitted with a vacuum formed vinyl upper finishes this economical seat.

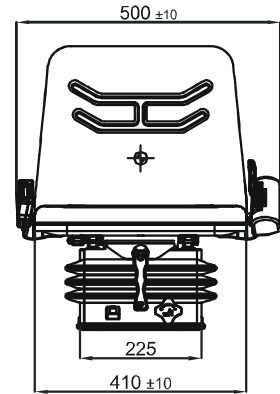

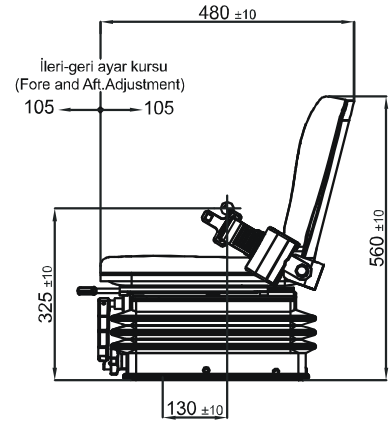

STANDARD FEATURES

- MECHANICAL SUSPENSION
- 150KG OPERATOR WEIGHT RATING
- HEIGHT INDEPENDENT WEIGHT ADJUSTMENT
- VACCUM FORMED VINYL UPPER

OPTIONS

- AIR SUSPENSION
- 12 OR 24 VOLT INTEGRATED COMPRESSOR
- LAP BELT
- TURNTABLE
- OPERATOR PRESENCE SWITCH

3130LC4

Heavy duty, ergonomically designed and comfortable.

The seat is suitable for construction-, forestry- and industrial vehicles.

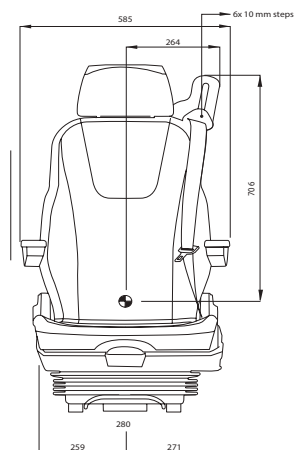

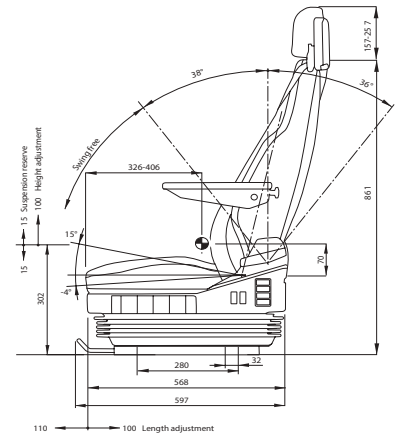

STANDARD FEATURES

- AIR /ELECTRIC SUSPENSION
- 180KG OPERATOR WEIGHT RATING
- 4 WAY ADJUSTABLE HEADREST
- 100MM WEIGHT INDEPENDENT HEIGHT ADJUSTMENT
- 180MM FORE AFT ADJUSTMENT
- ADJUSTABLE SEAT CUSHION LENGTH

OPTIONS

- TURNTABLES
- CLOTH OR LEATHER TRIMS
- RIGHT OR FORWARD CONTROLS
- FOOTREST
- MAP READING LIGHT

UES Refurbishment Program

Through our continuous improvement program UES can inhouse design and engineer different modifications to strengthen and improve the longevity of your seat. If it is financially unviable to repair your seat, UES can offer a comprehensive range of new ADR, Rail or Marine compliant seats to fit your application.

UES have the facilities to manufacture or remanufacture many components using our state of the art machinery. A computer controlled fabric cutting machine has the ability to cut any fabric to whatever size of trim you require in quantities from one to as many as your project demands. This means that all of your new trims are exactly the same with zero tolerances and the designs stored for any future demands.

Some of the clients utilising the repair and manufacture programs are:

ARIA

- Low back seat
- Lumbar support/personal fit
- Simple to adjust
- **Made & designed in Australia**
- Minimal assembly required
- Independently tested, certified & endorsed

Height: 820-900mm adjustable
Width: 600mm

ZEPHA

- High back seat
- Lumbar support/personal fit
- Simple to adjust
- **Made & designed in Australia**
- Minimal assembly required
- Independently tested, certified & endorsed

Height: 1179-1284mm adjustable
Width: 500mm

SIROCCO

- High back seat
- Lumbar support/personal fit
- Simple to adjust
- **Made & designed in Australia**
- Minimal assembly required
- Independently tested, certified & endorsed

Height: 1008-1113mm adjustable
Width: 500mm

- 360° swivel
- Control arm
- Height adjustable
- Fold-up footrest
- Premium leather vinyl
- Elastomeric suspension technology
- Premium sculpted foam

Options

- Pedestal slide track

G-Force Helm

Standard Features

- High back with integrated head rest
- Lightweight modular design and construction
- Ergonomic design for passenger comfort and support
- Direct deck pedestal mounted
- Forward and aft slide, 360 degree rotation and adjustable height
- Standard Seat width: 550mm (21.7in)
- Custom widths and heights available
- Foamless upholstery technology
- Low fire load

Options

- Pedestal slide track

Emergency & Defence Seating

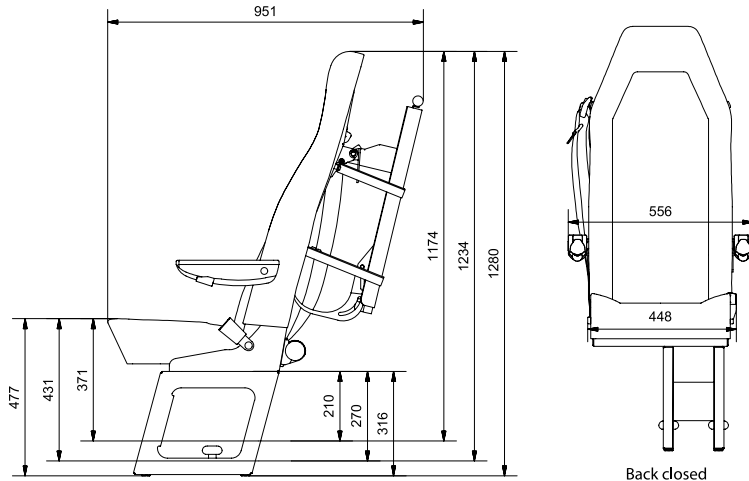

JANY 301

JANY 301 is equipped as standard with a static back, 3 point seat belt, integrated headrest and SmartDock. The seats can be fitted on Jany's flexible fully compliant Twinplate floor system.

Options

The JANY 301 seat can be supplied in OEM upholstery, vinyl, leather or customer-supplied special upholstery. Seats can be equipped with armrests.

Jany 301 SmartDockN

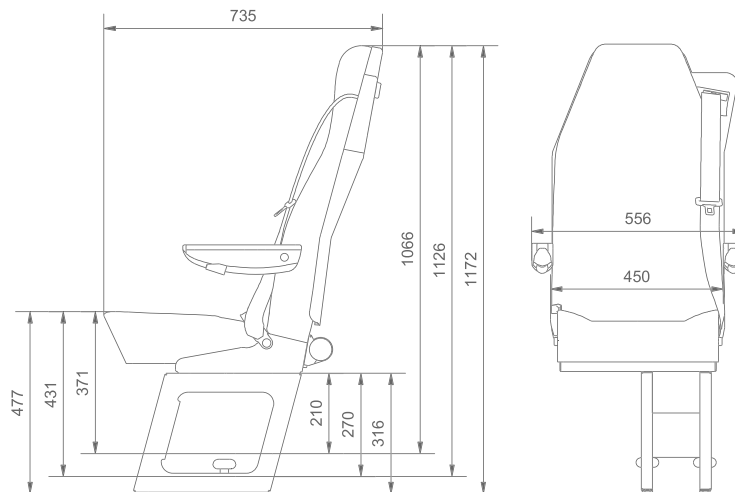

JANY 801

JANY 801 series is equipped as standard with a static back, 3 point seat belt and integrated headrest. JANY 801 Comfort has an adjustable headrest. The seats can be fitted on Seating A/S' flexible fully compliant Twinplate floor system.

Options

The JANY 801 seat can be supplied in OEM upholstery, vinyl, leather or customer-supplied special upholstery. Seats can be equipped with armrests, ISOFIX and Swivel & Slide.

Jany 801

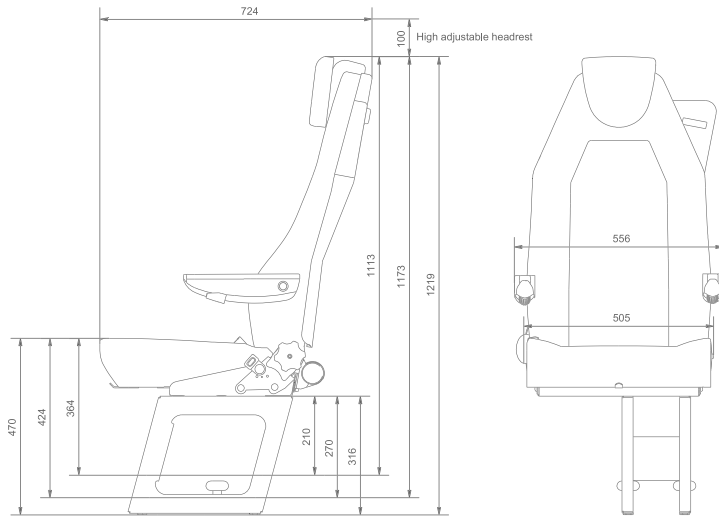

JANY 805 Police

JANY 805 Police comes as standard with an adjustable back, three-point safety belt, height-adjustable head rest, extra removeable headrest cushion, special back foam for bullet-proof vests, lower-back air support, a helmet hook and wide seat. The seat can be mounted in our flexible Twinplate floor system as well as our JANY Life floor.
